## Flood Relief Work in District Muzaffargarh, Jafferabad and Swat

**Submitted by: South Asia Partnership-Pakistan**

**Supported by: The Heinrich Böll Stiftung**

**Background:**

The extent of damage caused by recent floods is yet to be determined by the concerned authorities in Pakistan. These floods were the worst in Pakistan's history by any standard. Some seventy out of one hundred eight districts were badly hit by floods. According to reliable sources this flood has affected some 250 million people across Pakistan. It has destroyed million of acres of agriculture land, rendered million of people homeless. It inflicted massive loss to livestock sector Tens of thousands people had to take shelters in government schools and hospitals. A major chunk of affected people had to undergo testing times for their survival.

Though government and other relief agencies tried their level put to alleviate the miseries of floods-affected-people but to cater massive affected population was beyond their means. Pakistan will continue to face enormous challenge of bringing affected people back on their foot for many years to come. Realistically speaking, it is far beyond government capacity to cope with the disaster of this magnitude. It is demand of the hour that government, relief agencies, civil society and their networks come into a well coordinated mode of work to confront this challenge.

**South Asia Partnership-Pakistan**

South Asia Partnership-Pakistan is working in 46 districts across the country for the last six year through a program called Strengthening Democratic Governance in Pakistan (SDGP). This program is about forming Peasant and Worker's groups (PWGs) to enable them to negotiate for their rights. 25 out of 46 districts were badly hit by floods. Our PWGs with the help of District Partner Organizations played a key role in providing relief and early recovery services to affected people.

**SAP-PK and Relief and Early Recovery Initiatives**

South Asia Partnership-Pakistan is on ground with relief and early recovery initiatives through engaging its community based structures and networks. It strives for making informed choice for recovery and rehabilitation, through dissemination of needs based information and best practices. SAP-PK aims to take a support role for tailor-made initiatives undertaken by government, relief agencies and volunteer groups to rehabilitate lives and livelihood of the affected people including provision of housing, social amenities, infrastructure, and livelihood support, based on sustainable economy and ecology. It aims to contribute with the following objectives:

- To strengthen and support civil society and community based networks to coordinate and facilitate the government institutions, relief agencies, volunteer groups in collecting, exchanging, and disseminating information with regards to rehabilitation

- To enhance the formal and informal processes of community participation from villages to urban centers to enable the communities to ensure transparency and accountability in the implementation
- To evolve an efficient system to monitor the ongoing rehabilitation initiatives with human rights lens
- To support gender empowerment through involving women at all stages in the program implementation

### **Working Mechanism**

- **Information Centers** developed at district level by SAP-PK are primarily responsible for collecting and exchanging information, identifying the gaps and forwarding the suggestions to concerned authorities. These information centers are kept updated on day to day basis. It aims to keep informed all the stakeholders with regard to on ground realities so that they can bring changes in rehabilitation strategy in line with the needs of affected people.
- **Coordination** with civil society organizations including Action Aid, Human Rights Commission of Pakistan (HRCP), Strengthening Participatory Organizations (SPO), Aurat Foundation, government departments, national and international agencies and other volunteer groups is primary responsibility of SAP-PK. This coordination is directing civil society and relief organizations towards a common direction and promote efficiency among different stakeholders working for relief and rehabilitation.
- **Monitoring Committees** comprises of Partner Organizations, community level support structures and provincial staff members are orientated and went through short training sessions on how to monitor the rehabilitation activities. Findings of these committees will be shared with all stakeholders including media.
- **Engagement of Social Capital** of around 10,000 activists and 2000 volunteer groups formed, organized and developed by SAP-PK over the years has already been connected to Information Centers to collect and exchange information. They will be informed about different rehabilitation channels to be pursued for rehab work in different localities affected by floods.
- **Four Model villages** are being formed in one village in each district of each province. Rajanpur in Punjab, Jafferabad in Balochistan, Charsada in Khyberpukhtunkhwa and Dadu in Sindh have been selected for this purpose. It includes revival of socio-economic

structure including livelihood support, primary health, education and repair/construction of destroyed houses. These models will be shared with government and relief agencies to be replicated in other parts of the country.

### **Heinrich Böll Stiftung Support**

South Asia Partnership-Pakistan requested Heinrich Böll Stiftung for short-term-support for warm clothing to be distributed among floods-affected-people. On SAP-PK request Heinrich Böll Stiftung released Rs. 3.5 million rupees for warm clothing to be distributed in district Muzaffargarh, Swat and Jafferabad with the following objectives and results;

#### **Objective:**

- to provide floods affected people with warm clothing

#### **Results:**

- Floods affected people have access to warm clothing including sweaters, blankets, shawls, quilts, bed sheets, socks etc. 600 families, 200 in each district are provided with warm clothing
- Target families are linked with other support channels for food, shelter, medicines and livelihood.

### **Methodology**

#### **Identification of Beneficiaries:**

The door to door assessment exercise was undertaken as per a format having columns of Name, Father/Husband Name, NIC No, Gender, Family Size and Nature of Damage completely or partially. During this process identified beneficiaries were higher than target 60000 families in three districts.

#### **Verification of Beneficiaries**

This assessment was verified by our provincial team. During this process our provincial team selected only those families whose vulnerability level was high in terms of resources, shelter, food and cloth etc.

#### **Data Keeping**

After the verification, the data received through formats was entered in computer by data entry operator. After it token were prepared through data base. Each token contains Heinrich Böll Stiftung, name and logo of SAP-PK, name and logo of partner organizations, registration number, distribution date and venue, beneficiary name and father/husband name, NIC number, address and type of package.

### **Token Distribution Process**

A team was engaged for the purpose of door to door token delivery. The target beneficiaries were also verbally briefed about the date, time and venue of the distribution.

### **Identification of Distribution Points**

The selection criterion of distribution point was primarily based on the idea that target beneficiaries from all the villages can easily access the locations.

### **Distribution Process**

At distribution points proper seating arrangements were made for the beneficiaries. In some areas separate seating arrangements were made for male and female. Banners at distribution points were also displayed. Before the distribution beneficiaries were once again briefed about the objectives of the project and selection criteria. At distribution premises a team was engaged for verification of tokens issued to beneficiaries. For this purpose a beneficiary had to submit token and NIC. After verification process a beneficiary had to sign or put his/her thumb impression on the prescribed package mentioned in the token.

The distribution activity was undertaken with the participation of UPWG network. Assessment of the beneficiaries was completed by the District Partner Organization with the help of District UPWG network. The list of beneficiaries was shared with SAP-PK Provincial office which was later verified by provincial staff team. On approval of package the competitive bidding was done and lowest bidder placed order for the supply of items.

The beneficiaries who received the package appreciated the process very much. They were of the view that they had never facilitated at any distribution spot like such dignified manner.

### **Package Detail:**

<b>Province</b>	<b>District</b>	<b>Items</b>	<b>Quantity</b>
<b>Balochistan</b>	<b>Jafferabad</b>	Blankets (Single Bed, Double Ply)	2
		Shawl(Ladies)	2
		Warm Jackets (gents)	1
		Warm Sweater(ladies)	1
